## RISK MANAGEMENT PORTAL

### PREPARE YOUR MINISTRY

## FOR DATA BREACH AND CYBER ATTACK

#### **DATA BREACHES AND CYBER ATTACKS CAN TAKE YOUR MINISTRY BY SURPRISE**

If your ministry experiences a data breach or cyber attack would you be prepared? As we all know from the news, even very large for-profit companies aren't always ready to respond. Yet when a breach event or cyber attack occurs, time is of the essence.

Your ministry may have data on members, employees, retirees, and others which can be stolen, electronically "hacked" or lost through accidental or inadvertent release. Computer systems and their connection to the Internet play an important support function. No ministry can afford to lose important data and systems while still functioning at an optimal level.

Now you can assess your risk and develop an effective response plan to help you protect your members, volunteers and your organization's reputation in the event of an attack.

#### **IMMEDIATE ACCESS TO RISK MANAGEMENT TOOLS**

As part of our Cyber Liability and Privacy Crisis Management Expense coverage, we offer an online cyber risk portal that equips you with risk management tools to help you plan and prepare should a data breach or computer attack happen to your business. There's no cost; it's a complimentary service for our insureds.

It's called eRiskHub<sup>®</sup> and it's designed to help you better understand your risks and establish a response plan so you can manage the costs and minimize the effects of a data breach should one occur.

With a response plan and instant access
